PROFILE

Information Security professional with an M.Sc. from Stockholm University. Currently working as a System Administrator managing live Linux infrastructure. Specialises in DORA compliance, Compliance-as-Code, security operations, and IT infrastructure.

EXPERIENCE

System Administrator

Handlering

- Nov 2025 - Present
- Stockholm, Sweden
- Administer and harden Debian Linux servers for a Freedom of Information platform.
 - Manage SSH access, security patching, and resolve Nginx/Passenger outages.
 - Streamline workflows using Docker and Git for reproducible, secure environments.
 - Troubleshoot production issues across Linux, networking, and application layers.

Tech Support Volunteer

TEDxStockholm

- Mar 2025 - Feb 2026
- Stockholm, Sweden
- Supported production teams with technical setup, network troubleshooting, AV coordination, and vendor collaboration for secure, high-availability streaming.

Quality Analyst

Foundever

- Sept 2021 - Nov 2023
- Warsaw, Poland
- Evaluated operational data against compliance and security standards, generating KPI reports for management.
 - Coordinated interaction reviews and quality feedback across teams to improve operational procedures.

KEY SKILLS

Security & GRC:

- DORA
- ISO 27001
- Threat Modeling
- Splunk
- Wireshark

Systems & Cloud:

- Linux (Debian)
- GCP
- AWS
- Docker
- pfSense

Scripting & Automation:

- Python
- Bash
- PowerShell
- Git
- REST APIs

Infrastructure & Tools:

- Active Directory
- Jira
- Compliance-as-Code

- English (Fluent)
- Swedish (Basic)
- B Driver's License

CERTIFICATIONS

GCP: [Deploy Kubernetes Apps](#) & [Cloud Eng.](#)
IaC: [GCP IaC](#)
AWS: [Cloud Essentials](#) & [IAM Auth](#)

FEATURED PROJECTS

Source codes accessible by clicking project titles.

Cloud Security Scanner

Python Cloud Security Scanner

- 2024 - 2025
- Python
- AWS Boto3
- Security Automation
- DORA
- Built a Python-based AWS security scanner for my master's thesis, detecting S3, EC2, and IAM misconfigurations using Boto3. Mapped issues to DORA compliance and visualized results in a Streamlit dashboard.

SOC Analyst Home Lab

Security Operations Simulation

- 2024 - 2025
- Splunk
- VirtualBox
- Win Server
- Kali Linux
- Created a SOC home lab with Splunk Enterprise and Virtual-Box VMs (Windows Server 2022, Windows 10, Kali Linux) to simulate cybersecurity scenarios, enabling threat detection and incident response practice.

Sysadmin Home Lab

Enterprise SysAdmin Simulation

- 2024 - 2025
- Active Directory
- Networking
- Win Server
- PowerShell
- Set up an Active Directory home lab using VirtualBox and Windows Server 2022 to manage users, group policies, and network traffic with VLANs. Automated tasks with PowerShell for system administration.

EDUCATION

Master's in Information Security

Stockholm University

2023 - 2025

Stockholm, Sweden

Bachelor's in Computer Science

Vistula University

2018 - 2022

Warsaw, Poland
